

Define CS, fit into CC	<p>1. CUSTOMER SEGMENT(S)</p> <p>Non-technical business stakeholders (Marketing Manager, Sales & Ops). I but don't daily querying data know SQL;</p> <p>Overturbled Data Analysts who spending "simple data analysis".</p>	CS	<p>6. CUSTOMER CONSTRAINTS</p> <p>What the CSU becomes so controlling that user is in this, not running on their own. So it pushes back's constraint or what it can't give off stakeholder forced rules and constraints are still see overplan negotiations.</p> <p>Security/Privacy: Reluctance to use databases rigid schema or datums to 60%+ in transfers for storing data in public clouds.</p> <p>Budget: Limited budget due to more software and fail and database deployment data compliance.</p>	RC	<p>5. AVAILABLE SOLUTIONS</p> <p>One to our development flow off time to help us to be less off pressure to be fully done? steps bad. More to be able to do it faster using more flexible tools at specific transaction. Plus costs related on click and embed targets to fit into ROI, data available devices.</p>	AS	<p>Explore AS, differentiate</p>
2. JOBS-TO-BE-DONE / PROBLEMS							
2. JOBS-TO-BE-DONE / PROBLEMS	<p>"I need to know our churn rate by region." "the last 4 hours now." "about waiting for days" the ticket questions."</p>	JTD	<p>9. PROBLEM ROOT CAUSE</p> <p>There is syntax barrier by error, barrier. Human Translation in the "rigid: SQL Translation block Baseline Layer" between band developer client is human-dependent, is based on high-latency loop</p>	RC	<p>7. BEHAVIOUR</p> <p>Users currently copy-paste columns around in order to manually attack to stick to like to Sisley, or simply translate & "How much does did we sell?" Paris, in how decent data decisions make in get.</p>	BE	
Identify strong TR & EM							
Identify strong TR & EM	<p>3. TRIGGERS</p> <p>"An upcoming board meeting, suddenly, "we're losing," competitor campaign based on tickled pivot."</p>	TR	<p>10. YOUR SOLUTION</p> <p>If you are working on an existing client system or instance, start here to find out more. Otherwise, try one of our common triggers that happens forward from the baseline identity.</p>	SL	<p>7. CHANNEL SOLUTION</p> <p>Gemini Pro-powered Natural Language to SQL interface.</p> <p>A secure, schema-aware RAG (Retrieval) pipeline that optimized SQL instantly?</p>	CH	<p>Extract online & offline CH of BE</p>
	<p>Before: Frustrated, blocked, or static-blind, "data-blind". After: Empowered, confident in what we sell."</p>	EM			<p>8.1 OFFLINE</p> <p>Online: Slack/Teams integration (where users communicate from an Ask Data portal)</p>
